Do this one even if you skip the rest

AI Fluency isn't about Claude. Two university professors built it, and it teaches four habits that outlast whatever tool you use.

Delegation, what to hand over and what to keep.

Description, saying what you want clearly enough to get it.

Discernment, telling good output from bad.

Diligence, owning what you ship.

Most people think their problem is Description. It's usually Discernment.
